SOURCE Borba.LIGHT INDUSTRIES EXPAND OPERATIONSFIREBRICK FACTORY INCREASES PRODUCTION -- Zagreb, Borba, 4 Feb 52

The firebrick factory near Arandjelovac, more an artisans' workshop than a factory before the war, has been enlarged and modernized. As part of the "Orasac" Combine, it is to produce as much firebrick as was formerly produced throughout all Yugoslavia. The value of firebrick production alone is to amount to one billion foreign-exchange dinars. The minimum production of this factory will be sufficient to satisfy the needs of Yugoslavia. As industry expands, the factory is to increase its production.

The factory is preparing to produce fired clay products, roasted bauxite, firebrick, and crushed and powdered firebrick, if housing construction continues on the present scale.

A large cooperative center is to be erected in Arandjelovac when conditions become favorable. A standard-gauge railroad line is planned to connect the firebrick factory and Kolubara area with main railroad lines.

FACTORY TO PRODUCE SMALL ELECTRIC MOTORS -- Zagreb, Borba, 16 Mar 52

Zagreb, 15 March -- The Tvornica Baterija "Kroatija" ("Kroatija" Battery Factory) in Zagreb has begun production of a test series of 0.5-horsepower electric motors.

These motors are very economical because they are to be made from scrap iron left over from the production of large electric motors in the Tvornica "Rade Koncar" ("Rade Koncar" Factory). The factory is to use mostly women workers.

The first series of 100 motors is to be completed by the end of April. In 1952, the factory is to begin producing 0.75-horsepower motors and 1-horsepower motors.

NEW ASBESTOS SEPARATING MACHINE BEGINS OPERATION -- Zagreb, Borba, 30 Mar 52

Bosansko Petrovo, 29 March -- An asbestos separating machine is to be put in operation on 30 March in Bosansko Petrovo near Ozren. This is the first such machine in Bosnia-Herzegovina and the second to be constructed in Yugoslavia since the liberation.

NEW DAIRY BEGINS OPERATION -- Zagreb, Borba, 25 Mar 52

Novi Sad, 24 March -- The Centralna Gradska Mljekara u Novom Sadu (Central City Dairy in Novi Sad), which was put in operation on 24 March, has a daily capacity of 50,000 liters. Milk is to be purchased through collection stations in the three neighboring srezes. The stations are to handle about 25,000 liters daily [combined total for all stations?] after 1 April, a quantity sufficient to satisfy the chief needs of Novi Sad.

The milk is to be pasteurized. Milk products will be made from surplus quantities.
